

Environmental Policy

Aim

The aim of this environmental policy is to affirm Aughton Automations commitment to maintain the highest standard of quality of service whilst also minimising the company's effect on the environment. We understand the impact our activities may have on the environment and therefore operate an Environmental Management System accredited to ISO 14001:2015.

Policy

This policy has been developed between Directors and the senior management team of the company as an integral part of the business. All employees are equally responsible for complying with this Environmental Policy and are encouraged to suggest improvements to this end. Documentation, Implementation and management of this policy is the responsibility of the directors supported by the QHSE Management System.

Throughout its activities Aughton Automation will endeavour to:

- Ensure compliance with legal and other regulatory requirements
- Set targets and objectives for continuous improvement, prevention of pollution and measure, review and analyse our environmental performance
- Consistently monitor our Environmental Impacts and Aspects
- Minimise waste production and only use approved registered carriers for waste disposal
- Promote a culture where all employees contribute to the implementation of this policy
- Reduce consumption of resources (energy, materials and packaging), were feasible
- Ensure all activities are conducted in such a way as to cause minimum negative impact on the environment
- Communicate this policy and our commitments to all stakeholders including staff and organisations working for or on our behalf
- Ensure waste streams are identified, minimised and disposed of in line with environmental compliance and reduce, reuse and recycle, were feasible
- If practicable use materials with the least impact on the environment throughout their life cycle

We aim to achieve this in the following ways:

- Internal Audits and environmental performance reviews
- Train and educate all employees and anybody working on behalf of the organisation to promote Environmental policies and working practises

This policy will be reviewed annually to assess its effectiveness, compliance with environmental law and to ensure that it reflects changing needs and circumstances.
