

AUGHTON AUTOMATION

CONTROL INSTRUMENTATION, ELECTRICAL, MECHANICAL & CIVIL ENGINEERS

Quality Policy

Aim

The aim of this quality policy is to affirm Aughton Automations commitment to maintain the highest standard of quality in the way we work, services we deliver, relationships with employees and stakeholders to ensure continuous improvement.

Policy

Aughton Automations policy is to maintain an effective and efficient quality process planned and developed in conjunction with all management and staff functions and stakeholders, outlined in a series of policies and procedures (including external contracts, regulations and codes of practice) which are designed to eliminate deficiencies and inaccuracies and to ensure high quality standards.

The assurance of quality is fundamental for all work undertaken and is implemented by all staff in their work.

As a company we maintain consistency in working methods throughout in accordance with set policies, procedures, regulations and codes of practice and without significant deviation.

We ensure that all policies, procedures and relevant regulations are implemented and systematically reviewed to coincide with the company's values and regularly monitor and measure the quality of our working methods and outputs with a view to ensure high quality standards, best value and continuous improvement.

Responsibilities

It is the responsibility of the company Directors to ensure commitment to quality and the delivery of continuous improvement, the companies quality policy and quality objectives are established annually and are compatible with the context and strategic direction of the Company.

Commitment and Ownership

This quality policy requires commitment and ownership from all Aughton Automation staff and organisations working for or on our behalf.

This policy will be communicated to all stakeholders.

Following its initial adoption, this Quality Policy will be reviewed by the Company's Board of Directors at the scheduled Management Meeting and may be amended from time to time.
